Technical & Organisational Security Measures

These practices are subject to ongoing technical progress and development. Patchworks may update or modify them, provided that such changes do not diminish the overall security of the Services Patchworks provides under the Agreement.

1. Measures of encryption of personal data and pseudonymisation

TLS 1.2 or above is used as Full (Strict) encryption via Cloudflare Edge Certificates using

verified CA. AES 256 is used for data at rest using AWS infrastructure encryption. Data masking on PII data.

2. Measures to ensure the continuous confidentiality, integrity, availability, and resilience of processing systems and services include:

Continuous Monitoring is in place with alerting. Environments are split between production, stage, and development to ensure availability. Encryption, SSO and the principle of least privilege are implemented to ensure confidentiality. Hashing algorithms and data sanitisation are needed for data integrity, and a rigorous testing process is needed to ensure the platform's code quality and functionality/ resilience.

3. Measures to ensure the timely restoration of availability and access to personal data in the event of a physical or technical incident include:

We have a detailed BC/DR plan to restore our critical services in the event of outages. This includes an Incident Response Policy. Backups are kept to ensure redundancy across environments.

4. Processes for regularly testing, assessing, and evaluating the effectiveness of technical and organisational measures to ensure data processing security.

Established ISMS and policy suite to ensure processes exist to ensure data processing security. Maintaining ISO27001 and achieving SOC2 attestation has ensured process is followed across the organisation.

Strict access control to main Dev, DevOps and Security tools using the principle of least

privilege. change and audit logs to track changes and documentation to ensure knowledge transfer.

11. Measures for ensuring limited data retention

GDPR Statement and deletion request information publicly available. Data retention in line with our data retention schedule. Policy and processes established to ensure limited timings and schedules on data retention, storage and processing. Lifecycle policy on storage including AWS S3.

12. Measures for allowing data portability and ensuring erasure

Data backups are kept in AWS along with snapshots, volumes and other storage allowing data portability where required. Machine images are kept and managed. All follow a lifecycle policy setup and maintained in AWS.
